What each prompt contains

Each panel is the whole microwave innovation matrix (rows = layers, bottom to top: constraints, fields, technologies, components, functions, market needs, actors). Coloured nodes and edges are what the model sees.

Actors
Market needs
Functions
Components
Technologies
Fields
Constraints

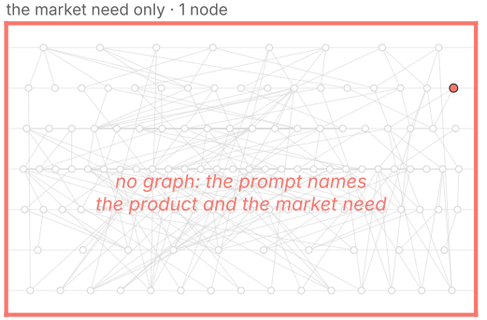

Full graph (A)

every market need · 123 nodes (100%)

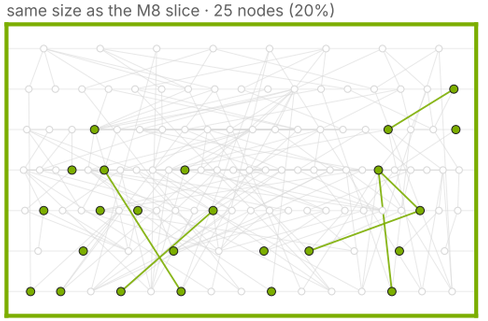

No graph (C), M8

the market need only · 1 node

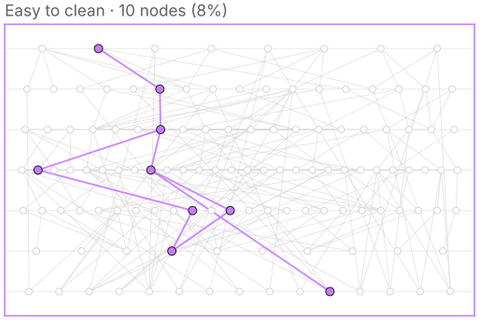

Random slice (R), M8

same size as the M8 slice · 25 nodes (20%)

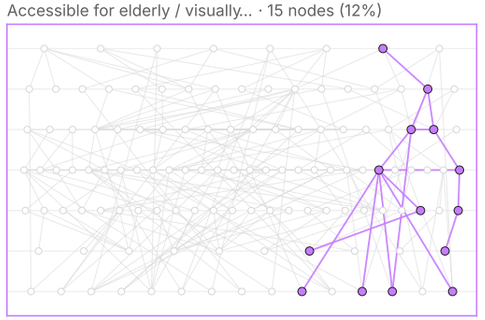

Slice (B), M11

Easy to clean · 10 nodes (8%)

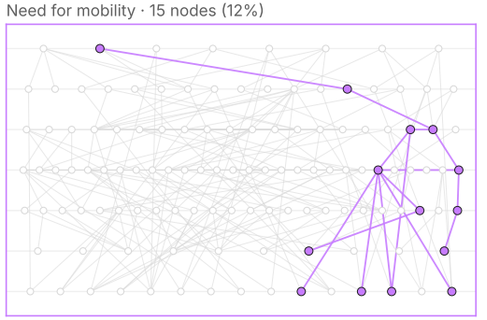

Slice (B), M14

Accessible for elderly / visually... · 15 nodes (12%)

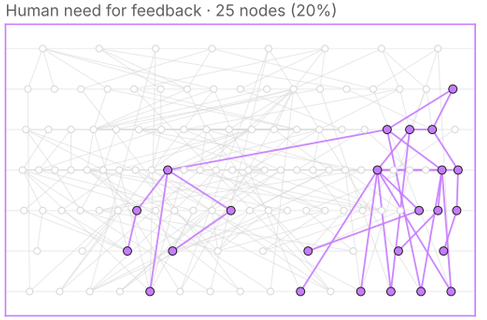

Slice (B), M16

Need for mobility · 15 nodes (12%)

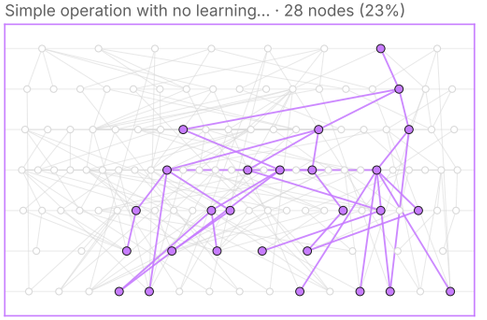

Slice (B), M8

Human need for feedback · 25 nodes (20%)

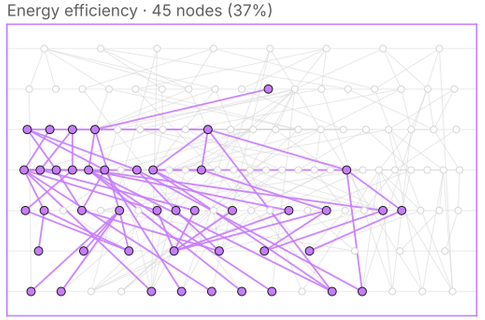

Slice (B), M6

Simple operation with no learning... · 28 nodes (23%)

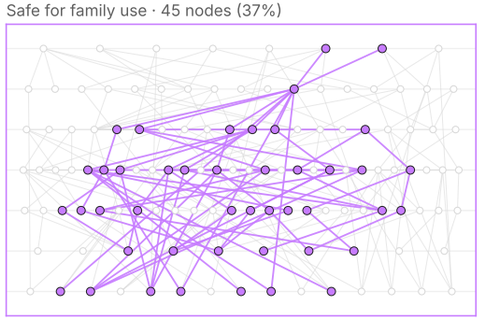

Slice (B), M13

Energy efficiency · 45 nodes (37%)

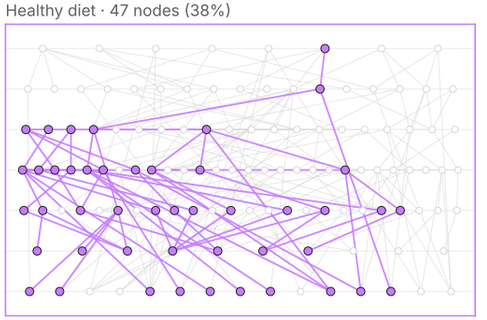

Slice (B), M7

Safe for family use · 45 nodes (37%)

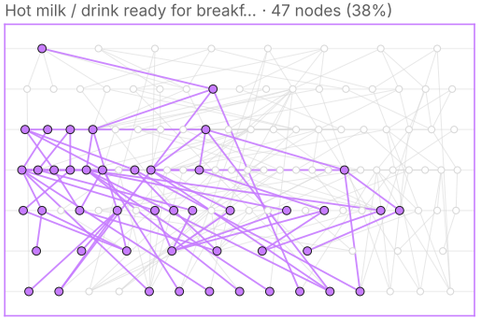

Slice (B), M12

Healthy diet · 47 nodes (38%)

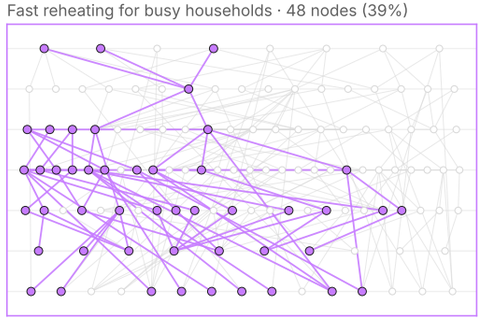

Slice (B), M3

Hot milk / drink ready for breakf... · 47 nodes (38%)

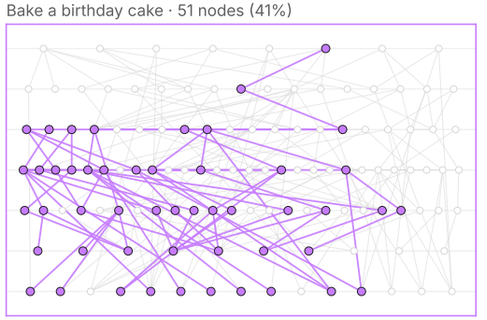

Slice (B), M1

Fast reheating for busy households · 48 nodes (39%)

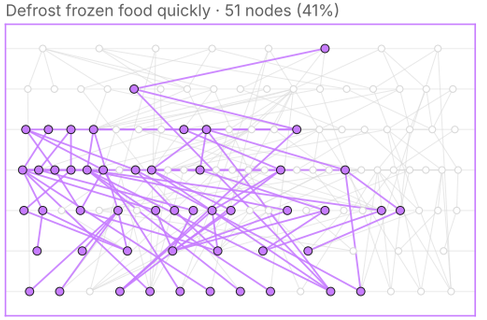

Slice (B), M17

Bake a birthday cake · 51 nodes (41%)

Slice (B), M4

Defrost frozen food quickly · 51 nodes (41%)

Slice (B), M5

Save time in the kitchen · 51 nodes (41%)
